

Zero Retries Podcast Edition 0099 2023-05-19

Zero Retries is an independent newsletter promoting technological innovation in Amateur Radio, and Amateur Radio as (literally) a license to experiment with radio technology.

Zero Retries' Editor is Steve Stroh N8GNJ.

This podcast is commentary on the Zero Retries 0099 newsletter that was published on 2023-05-19 at 15:30 Pacific.

See www.zeroretries.org for more details on Zero Retries.

In this edition:

- **Request To Send** - Publicly Accessible Amateur Radio Content
- **Story - Thought Experiment - Neil's Night - Part 3** - What Neil's Night is not (mostly, not a contest).
- **ZR > BEACON** - M17 OpenHT - A Breakthrough In Ham Radio
- **Feedback Loop** - Zero Retries Podcast seems well received by some (enthusiastically), but not all.

I'm still working out some of the issues in creating consistently good audio.

My thanks to "C" for the offer of significant help in producing the Zero Retries Podcast. Thanks also to "D" for some invaluable coaching (from deep experience) about the basics of audio production.

Those who don't care for podcasts, this one will be (I hope) the last podcast that I send to the "newsletter" subscribers. Look for an additional newsletter that will be for distribution of the podcast.

73,

Steve Stroh N8GNJ

Editor, Zero Retries
